Licensed by Sandia National Laboratories

DF-200®

(DF-100, MDF-200®)

PRODUCT:

In response to a national initiative sponsored by the US Departments of Energy and Homeland Security, Sandia National Laboratories developed the Sandia Decontamination Formulation for the mitigation and decontamination of chemical and biological agents. Independent testing has confirmed that the multiple patented formulation is effective against a broad spectrum of weaponized chemical and biological agents, chemical toxants and pathogenic organisms. Span-World sells DF-200® directly to authorized military, federal and state agencies.

Decon Solutions
